

StudyMint Pitch — Speaker Assignments

Deck: [docs/deck/studymint-deck.pdf](#) (10 slides)

Alice — Landing Page, Calendar, Video Commercial

- Slide 1: Landing Page
- Slide 6 (Demo): Calendar + Tasks card
- Slide 7: Runthrough / video commercial

Talking points

Slide 1 — Landing Page

- Open the pitch: what StudyMint is and who it's for.
- Read the tagline: "Plan, focus, take notes, and share resources — all in one place."
- Point to the live URL so the audience knows where to find it.
- Mention you built the landing page.

Slide 6 — Demo (Calendar + Tasks)

- Explain why Calendar is central to a student's workflow.
- Mention you built the Calendar view and its layout.
- Show how tasks tie to dates/subjects so students see what's due at a glance.
- Keep it to 2–3 sentences; pass to the next speaker smoothly.

Slide 7 — Runthrough / Commercial

- Introduce the video commercial or live walkthrough.
- Explain what the audience will see (real app, real features, real flow).
- If playing a video, cue it and let it run; if live demo, narrate the first step then hand off.

Jennifer — Timer Aesthetics

→ Slide 6 (Demo): Themed Timer card

Talking points

Slide 6 — Demo (Themed Timer)

- Explain the problem with boring timers: students abandon them.
- Describe the themed timer visuals (forest, beach, jungle, bamboo, mountain, etc.).
- Mention you designed the timer aesthetics — the look and feel, not the logic.
- Emphasize how the visual theme makes focus time feel calmer and less like a chore.
- End with the result: students actually stay for the full session because it's pleasant to look at.

Clare — Sleep Timer

→ Slide 6 (Demo): Sleep Planner card

Talking points

Slide 6 — Demo (Sleep Planner)

- Introduce sleep as a core part of student performance, not an afterthought.
- Explain what the Sleep Planner does: set bedtime, wake time, track rest.
- Mention you built the sleep timer / sleep planner feature.
- Connect it back to the app's promise: StudyMint cares about rest, not just grind.
- Keep it short and visual — 2–3 sentences.

Yian — Leaderboard

→ Slide 6 (Demo): Leaderboard card

Talking points

Slide 6 — Demo (Leaderboard)

- Explain why competition works for students: public ranks motivate consistency.
- Describe the leaderboard: users earn shells or points for focus time and climb ranks.
- Mention you built the leaderboard system.
- Tie it to accountability — friends can see each other's progress, so skipping study sessions is harder.
- End with the social loop: focus → earn → rank → repeat.

Jean — Integration, Dashboard, Core Functions, Admin, Aesthetics, Streaks

- Slide 2: The problem
- Slide 3: The person
- Slide 4: The market
- Slide 5: The competition
- Slide 6 (Demo): Notes, Shared Resources, Friends, Admin, Streaks, plus transition between demo cards
- Slide 8: What works
- Slide 9: The price
- Slide 10: The ask

Talking points

Slide 2 — The Problem

- State the one-sentence problem: students juggle too many apps.

- List the apps: planner, calendar, timer, notes, sleep tracker.
- Key line: “Nothing talks to each other.”

Slide 3 — The Person

- Define the user: high school and university students.
- What they want: one place to plan, focus, rest, and compete with friends.
- Read the quote as if it came from a real user interview.

Slide 4 — The Market

- Say the market is huge but fragmented.
- Use the stat: 6+ apps switched per study session.
- Conclusion: a single study-first workspace wins.

Slide 5 — The Competition

- Contrast Notion/Calendar and Forest/Pomodoro.
- Why they fall short: too generic or too narrow.
- Why StudyMint wins: plan, focus, rest, notes, and shared resources in one place.

Slide 6 — Demo (Your Cards)

- Introduce the demo slide as the team’s feature showcase.
- For **Notes**: explain import/export, AI review sheets, flashcards, and quiz generation.
- For **Shared Resources / Courses**: explain course-based material sharing (e.g., Integrated Maths 2, Precalc).
- For **Friends + Admin + Streaks**: briefly mention social accountability, admin panel, and streak system as glue that keeps users coming back.
- Transition between each teammate’s card so the demo feels like one coherent walkthrough.

Slide 8 — What Works

- Share 3–4 concrete learnings from building and testing.
- Public ranks drive competition.
- Friends + leaderboard drive daily return.
- Nature themes make focus feel calmer.
- Notes + shared resources keep everything in one workspace.
- User surveys and real feedback are driving last-minute improvements.

Slide 9 — The Price

- State plainly: free for every student.
- Mention future premium ideas only if asked (AI review sheets, analytics, class leaderboards).
- Keep this slide under 20 seconds.

Slide 10 — The Ask

- Three clear asks: try it, give feedback, vote for StudyMint.
- Read the URL one last time.
- End with a direct competition ask: "If you want students to have one focused workspace, vote for StudyMint."
- Thank the audience.
