

The student workspace.

Plan, focus, take notes, and share resources — all in one place.

study-app-five-drab.vercel.app

THE PROBLEM

Students juggle too many apps just to study.

Planner, calendar, timer, notes, sleep tracker — nothing talks to each other.

PRESENTER: JEAN

THE PERSON

High school & university students who want one place to plan, focus, rest, and compete with friends.

"I have Notion, Calendar, Forest, and Google Docs open just to finish one assignment."

THE MARKET

Ed-tech + student productivity is already huge — and fragmented.

6+ apps switched per study session

A single, study-first workspace wins against complexity.

THE COMPETITION

Why StudyMint wins

Notion / Calendar

Generic. Not built for student focus, rest, or friends.

Forest / Pomodoro

Focus only. No tasks, deadlines, or social accountability.

StudyMint

Plan, focus, rest, notes, and shared resources — together.

Plan. Focus. Rest. Notes. Share.

RUNTHROUGH

Live demo.

Walk through the app in real time.

study-app-five-drab.vercel.app

PRESENTER: ALICE

WHAT WORKS

Built, shipped, and tested.

- Students will compete on focus time when ranks are public.
- Friends + leaderboard drive daily return better than solo timers.
- Notes and shared course materials keep everything in one place.
- One workspace beats five disconnected apps.

THE PRICE

Free for every student.

\$0

Core product stays free. Premium add-ons later: AI review sheets, analytics, class leaderboards.

THE ASK

Try it. Give feedback. Tell a friend.

Create an account

and run a focus session today

Share feedback

what works, what breaks, what's missing

Pass it on

to one student who needs focus
